

# STRUCTURED DOCUMENT

## 1. INTRODUCTION

This document demonstrates structured content with clear headings and sections. The PDF extractor should be able to identify these structural elements.

## 2. METHODOLOGY

The methodology section contains information about the approach used. This includes various steps and procedures:

- Data collection and preprocessing
- Feature extraction and analysis
- Model training and validation
- Results evaluation and interpretation

## 3. RESULTS

The results section presents the findings of the analysis. Key metrics and observations are summarized below.

## 4. CONCLUSION

In conclusion, this structured document format allows the PDF extractor to properly identify and extract hierarchical content organization.
